DETAILED ACTION

1. This action is responsive to communication: Application, filed on 12/08/2003.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Chung et al. (Pub No: 2005/0071425) hereinafter "Chung"

For claim 1, Chung teaches "a recording medium having recorded therein information comprising audiovisual information (See paragraph [007-008])

"content identification information for identifying content of the audiovisual information"(See paragraph [0010])

"locator information relating to the audiovisual information for locating a provider of service information"(See paragraph [0037], [0044])

Art Unit: 2168

For claim 2, Chung teaches “ wherein the locator information relating to the audiovisual information comprises URL information of a server providing service information relating to the audiovisual information” (See paragraph [0013], [0044])

For claim 3, Chung teaches “a recording medium control module configured to read content identification information from a recording medium for identifying content of audiovisual information and locator information relating to the audiovisual information in the recording medium, the locator information relating to the audiovisual information for locating a provider of service information (See paragraph [0004-0008], [0014], [0044])
“a network control module configured to connect with the provider of service information based on the locator information”(See paragraph [0037], [0044])

For claim 4, Chung teaches “wherein the network control module is configured to send to the provider associated with the locator information the content identification information, and to receive from the provider service information containing at least one of text information and audiovisual information corresponding to the content identification information”(See paragraph [0027])

For claim 5, Chung teaches “further comprising a database control module configured to store content identification information relating to audiovisual information” (See paragraph [0003], [0008], [0040])

Art Unit: 2168

For claim 6, Chung teaches “wherein the database control module is configured to register the content identification information and the locator information in a management database if the content identification information and the locator information have not been registered in the management database” (See paragraph [0008], [0038], [0040])

For claim 7, Chung teaches “further comprising a playback control module configured to output information to a display device to display information, wherein the playback control module generates distinction information distinguishing, from the service information received from the provider, between audiovisual information of content identification information not registered in the management database and audiovisual information registered in the management database, and outputs the distinction information to the display device(See paragraph [0007], [0008], [0015], [0039])

For claim 8, Chung teaches “further comprising a system control module configured to determine whether there is a request to acquire service information based on the locator information”(See paragraph [0038])

For claim 9, Chung teaches “wherein the system control module is configured to determine whether the service information to be acquired has already been received previously, and to not acquire the service information if the service information has previously been received” (See paragraph [0042])

For claim10, this claim is rejected on grounds corresponding to the arguments given above for rejected claims 4-7 and are similarly rejected.

For claim11, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 6 and is similarly rejected.

For claim12, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 9 and is similarly rejected.

For claims 14 and 17, these claims are rejected on grounds corresponding to the arguments given above for rejected claim 4 and is similarly rejected.

For claims15-16, these claims are rejected on grounds corresponding to the arguments given above for rejected claim 5-6 and are similarly rejected.

For claims18-20, these claim are rejected on grounds corresponding to the arguments given above for rejected claims 7-9 and are similarly rejected.

For claims 21, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 3 and is similarly rejected.

Art Unit: 2168

For claim 22, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 5 and is similarly rejected.

For claim 23, this claim is rejected on grounds corresponding to the arguments given above for rejected claim 8 and is similarly rejected.
